

## Job Vacancy Posted August 2007

### Technical Applications Analyst

**Start Date: ASAP**

**Location: Uxbridge UK**

Job Description:

GTS Geotech is looking for an Engineering and Drilling Applications Specialist to work at a client site in Uxbridge, North London.

The role is for an experienced support specialist who is willing to develop additional skills in Petrel and G&G applications.

#### **Job Description:**

This position is responsible for providing application support across the full range of technical applications. The main focus for this position are the applications used within the Engineering and Drilling functions, and to be the contact for the PC-based applications within the technical portfolio.

Provision of application support to the business users for the range of technical applications available. This will entail working in conjunction with other members of the Technical Systems team, and will also involve interaction with IT Operations.

Specific focus on Engineering and Drilling applications (Schlumberger's Eclipse and Landmark drilling apps.) and other PC-based applications, including Petrel.

Good Client facing skills are essential.

Installation of software updates, and licence management and administration.

Data management in relation to key technical applications.

End user support, to include assistance with project related work utilising application toolkit.

Interaction with vendors to provide support and to maintain applications, including licence renewals, maintenance and support.

Ongoing development of services in support of business activity.

Provision of backup to other members of the Technical Systems team.

#### **Skills:**

Must be willing to learn new skills as required

Excellent working knowledge of key engineering and drilling applications (e.g. Eclipse, Petroleum Experts, Landmark drilling applications).

Proven experience in supporting applications on both PC and UNIX platforms.

Proven experience with licence management and administration.

Good understanding of all petrotechnical data types, and a demonstrable understanding of a broad range of engineering & geotechnical applications.

Excellent communication skills and confidence to interact with internal and external groups. Ability to work independently, take initiative, maintain high levels of customer satisfaction, and high quality of service.

PREFERRED: Bachelor degree in relevant discipline (Petroleum Engineering or Geoscience)

PREFERRED: Knowledge of and experience with support and data management for Schlumberger's Petrel application.

DESIREABLE: Knowledge of GIS systems.

**GTS Geotech offers a competitive salary depending on experience, benefits package, including non-contributory pension scheme and private health and travel insurance, relocation assistance may be available if required.**
