

Job Vacancy Posted July 2007

Landmark Application Support

Start Date: ASAP

Location: Houston Texas USA

GTS Geotech are currently seeking to recruit a number of Landmark Application Support Specialists. We have a number of positions available based in major oil companies, where you will work as part of a support team.

You will need to be already authorized to work in the USA or be an existing GTS Geotech employee.

Landmark Application Support Specialist

Role and Responsibilities:

- Perform troubleshooting of client's Landmark application issues. Own such issues until escalated or resolved and ensure issues are resolved to client's satisfaction.
- Help improve client workflow and/or dataflow processes
- Develop and promote best practices
- Provide mentoring for client's team on a variety of Landmark applications
- Office at client site and provide applications support

Background/Experience:

- Desired: 5-10 years of E&P industry experience
- Experience with Landmark applications including SeisWorks, OpenWorks, Powerview, StratWorks, etc and other G&G software applications

Technical Competencies:

- Understanding of Exploration and Production technologies, workflows and dataflows
- Ability to match technical solutions to customer's business needs
- Excellent analytical and problem solving skills
- Thorough knowledge of Landmark's core application suite
- Proficient with Unix/Linux OS
- Strong OpenWorks Data Management

We offer an attractive salary and benefits package, dependent on experience. Please include your current salary details when responding. Email your CV and cover letter to tim.shepherd@gts-geotech.com

GTS Geotech offers a competitive salary depending on experience, benefits package, including non-contributory pension scheme and private health and travel insurance, relocation assistance may be available if required.
