

## Job Vacancy Posted November 2009

### Landmark Data Manager

**Start Date: ASAP**

**Location: Houston Texas USA**

GTS Geotech are currently seeking to recruit a number of Landmark Data Managers. We have a number of positions available based in major oil companies, where you will work as part of a support team.

You will need to be already authorized to work in the USA or be an existing GTS Geotech employee.

#### **Role and Responsibilities:**

- 2D & 3D seismic data loading into Landmark
- Ensure data is loaded using correct cartographic projection
- Manage projects already loaded and associated disk resources
- OpenWorks well data loading and database management of well data such as headers, curves, production, interpretation, velocity and positional data
- Project creation and management
- Import/Export of interpretation data

#### **Background/Experience:**

- Desired: 3+ years of E&P industry experience
- Experience with Landmark applications including SeisWorks and/or OpenWorks
- Proficient with Unix/Linux OS, tape drives and stackers, data loading and transfer routines
- Experienced in performing quality control of navigation and directional data.

#### **Technical Competencies:**

- Understanding of Exploration and Production technologies and dataflows
- Ability to match technical solutions to customer's business needs
- Excellent analytical and problem solving skills
- Thorough knowledge of data management in OpenWorks and SeisWorks applications
- Proficient with Unix/Linux OS

We offer an attractive salary and benefits package, dependent on experience. Please include your current salary details when responding. Email your CV and cover letter to [tim.shepherd@gts-geotech.com](mailto:tim.shepherd@gts-geotech.com)

**GTS Geotech offers a competitive salary depending on experience, benefits package, including non-contributory pension scheme and private health and travel insurance, relocation assistance may be available if required.**
